

AI AND MODEL GOVERNANCE FOR REGULATED INDUSTRIES

Auditrol connects policies, controls, data, and owners into one execution layer, so agents reach production and models stay defensible.

Auditrol Named a Disruptor in Agentic AI in Chartis Research RiskTech100® 2027

Independent benchmark recognizes Auditrol for AI-driven risk governance and continuous assurance

CHARLOTTE, N.C., September 24, 2026 – [Auditrol](#), the AI-native risk management and governance platform for financial institutions, today announced that [Chartis Research](#) has recognized the company as a Disruptor in Agentic AI in its RiskTech100® 2027 report.

RiskTech100® is Chartis Research's annual flagship report and independent benchmark of the world's leading risk technology providers. Financial institutions, insurers, and corporates rely on it to evaluate risk and compliance technology partners. Vendors are assessed across six dimensions: functionality, core technology, strategy, customer satisfaction, market presence, and innovation.

"This recognition belongs to our customers, our partners, and our team," said [Ashwin Nayak](#), CEO and Co-founder of Auditrol. "As organizations scale AI across the enterprise, strong governance is critical to managing risk with confidence. We built Auditrol so risk and governance leaders can trust, explain, and act on decisions."

"This acknowledgment reflects the confidence our customers have placed in us and the work still ahead," said [Chris Nobili](#), President and Co-founder of Auditrol. "Regulators, boards, and executives are asking harder questions about how AI and models are validated, monitored, and controlled. We're grateful to help risk, audit, and compliance teams answer those questions through continuous assurance, and we remain committed to earning that trust with every deployment."

The full list of RiskTech100® 2027 winners is available at <https://lnkd.in/eBe9ehWA>.

About Auditrol

Auditrol is the connected assurance platform for AI, model, and data risk in regulated industries. It links policies, controls, data, and owners into one execution layer so agents reach production and models stay defensible. Live controls halt policy breaches in real time and sync evidence into tools control owners use. Learn more at www.auditrol.com.

About Chartis Research

Chartis Research is a leading provider of research and analysis on the global market for risk technology. Its RiskTech100® report is an annual ranking of the world's major players in risk and compliance technology.
